

Information Technology

ERP Analyst

We are actively seeking an outstanding candidate with comprehensive expertise in MS Dynamics BC technology and/or processes.

In this role, you will collaborate with our ERP team and cross-functional project teams to support the development and enhancement of enterprise solutions across the Group.

Key Responsibilities:

- Analyze business requirements and processes to design solutions that align with operational objectives.
- Lead the implementation of new ERP systems, including the preparation of specifications, design documents, test cases, and user training.
- Drive innovation by identifying and validating new opportunities through proof-of-concepts and pilot initiatives.
- Support system transitions, including data migration from legacy systems to Microsoft Dynamics 365 Business Central.
- Conduct functional and user acceptance testing to ensure solutions meet defined business needs.
- Collaborate with internal stakeholders to ensure successful project delivery and user adoption.
- Provide ongoing support by resolving issues, enhancing existing systems, and delivering solutions for evolving business requirements.
- Manage change requests and oversee end-to-end solution delivery

Requirements:

- Diploma/ Degree in Computer Science or equivalent qualification.
- Demonstrated proficiency with the implementation and support of Dynamics NAV/Dynamics BC is a MUST.
- Proficient in MS Power BI would be advantageous.
- Highly organized, detailed oriented, possess excellent communication and interpersonal skills, enjoy working with end users.
- Proactive problem-solving attitude with the ability to anticipate issues.
- Openness to feedback and a commitment to ongoing professional development.
- Proficient in drafting professional reports and other project related documentation.
